Microsoft Partner

Anthropic Partner

Open-source maintainer

Devtools builder

Webhook / API tooling

AI-agent workflows

★ SUMMARY

Product-minded full-stack engineer and solo builder focused on developer tools, workflow automation, agent systems, webhook/API infrastructure, and performance-conscious software. Strong background in frontend architecture, interactive product engineering, and full-stack delivery across web, mobile, API-driven, and enterprise workflow systems.

Partner / certification track: Microsoft Partner and Anthropic Partner through admin@ar27111994.dev; four Anthropic certifications completed Jun 2026.

✂ SELECTED PRODUCTS & OPEN-SOURCE WORK

Webhook Debugger and Logger

Enterprise-grade webhook testing suite: capture, inspect, replay, forward, validate (JSON Schema), mock, and stream events in real time. SSE live streaming. SSRF-conscious forwarding. HMAC-SHA256 signature verification, structured incident log.

🐙 github.com/ar27111994/webhook-debugger-logger

agent-harness

Node.js / TypeScript CLI for discovering, staging, activating, and wiring reusable AI-agent assets across VS Code/Copilot, OpenCode, Cursor, Zed, Claude Code, and Pi.

🐙 github.com/ar27111994/agent-harness

penpot-mcp

An agent skill for creating, auditing, and maintaining Penpot design systems, prototypes, and design tokens via MCP.

🐙 github.com/ar27111994/penpot-mcp

Legacy OSS / Freemium

- **Shopping Cart Library** — PHP class for add/update/delete/destroy cart operations with session persistence. Used by hundreds on phpclasses.org.
- **Mosaico + CodeIgniter** — Open-source WYSIWYG email template editor integrated with custom PHP/CodeIgniter backend and database.
- **OpenCart 3.x extensions** — 3-Level Menu extension and Obligr SMS Order Alert with customized admin email (Indian merchants).
- **CRUD Scaffolding Templates** — AJAX search/sort/page with Excel/CSV export; generic repository pattern on Entity Framework 6.
- **OpenBiz** — Open-source supply chain management system built on ASP.NET MVC, Entity Framework, Razor, C#, jQuery, Bootstrap.
- **National Criminals Database** — WCF + ASP.NET MVC demonstrating N-Layered Architecture with web client contracts and unit tests.
- **Bookstore** — Full-featured SEO-friendly bookstore with admin panel, vanilla PHP with PSD-to-HTML design implementation.

📄 WRITING / PUBLIC TECHNICAL CONTENT

👛 EXPERIENCE

Frontend Engineer

Eagle 6 — cybersecurity product securing large enterprises by detecting unknown vulnerabilities

Feb 2018 – Mar 2022

- Implemented frontend for Cloud Storage and Organization Chart Modeling modules of the flagship enterprise product alongside integration and customization of rich text document editing tools via Angular-ized plugins.
- Built file and folder management with role-based permissions assignment, preview and edit capabilities based on file type and user permission level.
- Created complex plugin-based online editors for short and full-featured documents with Microsoft Office file support, concurrent editing, permission-based content controls, and PDF export.
- Implemented chunked file/folder upload using TUS protocol for scalability and large-file support.
- Rebuilt the Organization Chart Modeling tool on GOJS with Akita (Redux/Flux) state management for scalability and robust maintenance.
- Built and maintained graph and map interfaces for Network Monitoring tools using D3, Highcharts, Leaflet, and OSM Tiles server.
- Standardized UI output with a responsive, accessible Google Material Design system across all modules.
- Interviewed and facilitated hiring of multiple frontend developers; drove code quality through restructuring, code review, and mentoring.
- Assessed UX/UI designs for technical feasibility and provided implementation estimates in an Agile-driven environment.

Angular 7+ · TypeScript · Angular Material · RxJS · Akita · GoJS · D3 · Highcharts · Leaflet · OSM · Jest · SCSS · BEM · TUS

Full-Stack Freelance Contractor

Upwork / Independent Client Work

May 2017 – Feb 2018

- Implemented, maintained, managed, and delivered solo projects as a freelance contractor in a timely manner.
- Spun out free and open-source projects based on solo freelancing work (with client consent).
- Contributed bugfixes to multiple open-source libraries to solve issues in client projects.
- Converted mockups into HTML, JavaScript, AJAX, and JSON.
- Used programming capabilities in Angular, Ionic, TypeScript, PHP, WordPress, OpenCart, C#, SQL, jQuery, JavaScript and other libraries as needed.
- Created a Microsoft Remote Desktop Services project with Citrix App Layering on Azure Integration — learning the entire stack from scratch.
- Fixed, maintained, and extended existing projects developed and deployed by other developers.
- Created and extended fully featured mobile apps with backend REST APIs and databases using Ionic 3, Angular 5+, PHP, MySQL alongside mobile-specific features like camera and payment gateway integration via Apache Cordova.
- Deployed and managed web and mobile backends using UNIX and Apache web servers.

Angular · Ionic · TypeScript · PHP · MySQL · CodeIgniter · WordPress · OpenCart · C# · Azure · Cordova · Xamarin · Apache · Nginx

Founder / Owner — Goggle Hunt

Shopify dropshipping — fashion & sports goggles, US & EU markets

May 2017 – Sep 2017

- Identified a primary keyword with 600K monthly Google searches and low competition in the US market.
- Created, maintained, marketed, and did product sourcing for the Shopify store; ran day-to-day operations for 4 months while freelancing full-time.
- Conducted Instagram influencer interviews and giveaway competitions for marketing and brand reach.
- Created and ran four social media accounts, each reaching a few hundred followers.
- Collected ~150 email subscribers, majority via a Gleam competition campaign.
- Created a Facebook Merchant Account with all shop products integrated for frictionless purchasing.
- Sold the full business on Flippa to focus exclusively on a software engineering career.

PHP Developer

GMINNS — Genius Marketing INNOvationS

Jul 2015 – Apr 2016

Worked on customization of a School Management System based on customer requirements, alongside initial development of a Saudi football federation club management portal. Built and maintained PHP web applications with database-driven features and custom CMS components.

Web Developer

COMITS

Jul 2014 – Mar 2015

Built WordPress sites for a local newspaper and a local printing shop with custom themes and image sliders. Built an e-commerce website for the company in OpenCart. Delivered client web projects in PHP / JavaScript covering frontend, backend, and deployment.

🔧 TECHNICAL SKILLS

Frontend

TypeScript · Angular · React · Next.js · RxJS · Angular Material · Akita · Jest · SCSS · BEM · D3 · Highcharts · GoJS · Leaflet · OSM

Backend / Systems

Node.js · Express · ASP.NET Core · PHP · CodeIgniter · WordPress · OpenCart · API integrations · automation workflows

Data / Delivery

Infrastructure

🎓 EDUCATION

M.C.S. — Master of Computer Science

Arid Agriculture University, Rawalpindi

Oct 2014 – Aug 2016

Digital Design · Web & Desktop Development · Operating Systems · System Programming · Networking · Software Engineering · Database Systems
· Artificial Intelligence · Data Structures

B.Sc. — Computer, Statistics and Mathematics

University of the Punjab

Sep 2012 – Jul 2014

Computer Science · Software Engineering · Databases · Operating Systems · Statistics & Probability · Calculus · Mathematical Methods

📜 CERTIFICATIONS / COURSEWORK

Coursera — ML Strategy & Error Analysis

Completed 12/05/2019

Diagnose errors in ML systems; prioritize improvement directions; mismatched train/test sets; human-level performance comparisons; end-to-end and transfer learning; multi-task learning.

www.coursera.org/account/accomplishments/verify/HQ3883739EQ7

Coursera — Deep Learning Best Practices & Optimization

Completed 07/04/2019

L2/dropout regularization; batch normalization; gradient checking; optimization algorithms (mini-batch GD, Momentum, RMSprop, Adam); train/dev/test setup; bias/variance analysis.

www.coursera.org/account/accomplishments/verify/U4QYCQLM9WUH

Coursera — Deep Learning Foundations + TensorFlow

Completed 20/08/2018

Fully connected deep neural networks; vectorized implementation; key architecture parameters; TensorFlow implementation; major technology trends driving Deep Learning.

www.coursera.org/account/accomplishments/verify/TDDMYNV57A99

Coursera — Big Data Fundamentals & Hadoop

Completed 29/10/2018

Big Data landscape (volume, velocity, variety, veracity, valence, value); 5-step analysis process; Hadoop architecture (YARN, HDFS, MapReduce); scalable big data analysis.

www.coursera.org/account/accomplishments/verify/HHVS4SJNXDR8

🔗 Anthropic Certifications — completed Jun 2026

Building with the Claude API — verify.skilljar.com/c/kqdnajm977y

Claude Code in Action — verify.skilljar.com/c/gv2gvaw48jus

Introduction to Agent Skills — verify.skilljar.com/c/8wqzsm9q9o9w

Introduction to Model Context Protocol — verify.skilljar.com/c/nhscqtess3nq

🏢 Microsoft Virtual Academy

Microsoft Remote Desktop Services Deep Dive — Pending verification (microsoft.com/en-us/learning/)
