SUMMARY

Product-minded full-stack engineer and solo builder focused on developer tools, workflow automation, agent systems, webhook/API infrastructure, and performance-conscious software. Strong background in frontend architecture, interactive product engineering, and full-stack delivery across web, mobile, API-driven, and enterprise workflow systems. Recent work centres on practical developer tools, reusable AI-agent assets, automation-heavy products, and technical writing that turns shipped work into credible proof.

CURRENT TECHNICAL DIRECTION

Developer tooling: webhooks, API debugging, AI-agent assets, MCP/design-to-code integration, CLI tooling.

Product execution: open-source products with documentation, launch writing, HN/PH presence, monetisation paths.

Engineering taste: maintainable systems over fragile demos — readable architecture, predictable behaviour, performance-aware UX.

Partner / certification track: Microsoft Partner and Anthropic Partner through admin@ar27111994.dev; four Anthropic certifications completed Jun 2026.
