Ahmed Rehan

Full-stack engineer for devtools, automation-heavy product workflows, and client-facing engineering delivery

Best fit for products that need real implementation depth, reliable delivery, and someone comfortable owning messy workflow problems end to end.

admin@ar27111994.dev · wa.me/923315887235 · ar27111994.dev · github.com/ar27111994 · [Upwork profile](#)

Client delivery Devtools Automation Webhooks Open source

Positioning

I help clients build developer tools, internal dashboards, webhook/API systems, and workflow-heavy products without losing delivery discipline, debugging clarity, or handoff quality. The most useful projects are the ones where implementation details actually matter.

Best-fit work

Developer tools, webhook/API integrations, debugging systems, automation-heavy products, and engineering utilities that need more than brochure-level frontend work.

Selected product proof

Webhook Debugger and Logger

Open-source webhook suite for capture, replay, forwarding, schema validation, and signature-aware debugging.

25 GitHub stars · 3 forks · v3.0.5 release

Experience

Independent Engineer & Founder — ARLabs

ARLabs / solo product workMar 2022 – Present

- Built and shipped public tooling across agent-harness, Webhook Debugger and Logger, and penpot-mcp.
- Combined implementation with launch-surface work: public writing, proof links, and product packaging that makes the work verifiable to clients.
- Kept the work grounded in practical delivery: debugging clarity, workflow reliability, and maintainable handoff quality.

Frontend Engineer

Eagle 6Feb 2018 – Mar 2022

- Built Angular-based modules for a cybersecurity product serving large enterprises.
- Delivered document workflows, monitoring interfaces, file/folder permissions, plugin-based document editing, and chunked large-file uploads.
- Interviewed and helped hire frontend developers, reviewed code, and improved state-management and UI consistency.

Full-Stack Freelance Contractor

Upwork / independent client workMay 2017 – Feb 2018

- Delivered end-to-end client projects across web and mobile, including a 115-hour Azure/Citrix App Layering engagement and an \$850 OpenCart mobile app project.
- Worked across Angular, Ionic, PHP, MySQL, Apache/Nginx, REST APIs, Cordova, and inherited systems.
- Client feedback includes repeat-work language: “We will always return to him first when we get more work.”

Founder / Owner — Goggle Hunt

Shopify store May 2017 – Sep 2017

- Built, marketed, and sold a Shopify store while also freelancing full-time.
- Grew a few hundred social followers and ~150 email subscribers before the Flippa exit.

Technical stack

Frontend: TypeScript, Angular, React, Next.js, RxJS, Angular Material, Akita, Jest, SCSS, D3, Highcharts, GoJS, Leaflet

Backend: Node.js, Express, ASP.NET Core, PHP, CodeIgniter, WordPress, OpenCart, REST APIs, automation systems

Data / delivery: MySQL, SQL Server, Docker, Azure, Linux, Vercel, Git, GitHub, Jira

Infrastructure: Apache, Nginx, IIS, Cordova, Xamarin, Citrix App Layering

Education & credentials

Education: M.C.S. — Arid Agriculture University (2014–2016) · B.Sc. — University of the Punjab (2012–2014)

Anthropic coursework: Building with the Claude API · Claude Code in Action · Introduction to Agent Skills · Introduction to Model Context Protocol

Coursera: ML Strategy & Error Analysis · Deep Learning Best Practices & Optimization · Deep Learning Foundations + TensorFlow · Big Data Fundamentals + Hadoop
