- Webhook tooling
- AI-agent workflows
- Performance-conscious full-stack engineering

SUMMARY

Product-minded full-stack engineer and solo builder focused on developer tools, workflow automation, agent systems, webhook/API infrastructure, and performance-conscious software. Strong background in frontend architecture, interactive product engineering, and full-stack delivery across web, mobile, API-driven, and enterprise workflow systems. Recent work centers on practical developer tools, reusable AI-agent assets, automation-heavy products, reliable open-source software, and public technical writing that turns shipped work into credible proof.

CURRENT TECHNICAL DIRECTION

- Developer tooling:** webhooks, API debugging, AI-agent assets, MCP/design-to-code workflows, automation, and host-aware CLI tooling.
- Product execution:** open-source products with documentation, launch writing, HN/Product Hunt/GitHub surfaces, and realistic paths to adoption or monetization.
- Engineering taste:** maintainable systems over fragile demos: readable architecture, security-sensitive defaults, clear CLI behavior, practical deployment, and performance-aware UX.
- Partner / certification track:** Microsoft Partner and Anthropic Partner identity through admin@ar27111994.dev; Anthropic certification work in progress.

SELECTED PRODUCTS & OPEN-SOURCE WORK

agent-harness

Node.js / TypeScript CLI for discovering, staging, activating, and wiring reusable AI-agent assets across VS Code/Copilot, OpenCode, Cursor, Zed, Claude Code, and Pi.

- Highlights:** reusable agent-asset lifecycle, host-aware activation, AI-agent workflow infrastructure, and cross-editor asset management.
- Public proof:** technical writing on restrained skill bundles and the need for lifecycle management for agent assets.
- Links:** <https://github.com/ar27111994/agent-harness> · <https://deepwiki.com/ar27111994/agent-harness>
- Technologies used:** TypeScript, Node.js, CLI design, filesystem automation, host configuration, documentation systems.

Webhook Debugger and Logger

Enterprise-grade webhook testing suite for developers: capture, inspect, replay, forward, validate, and mock webhook traffic in real time without persistent tunnels.

- Highlights:** SSE live streaming, JSON Schema validation, replay flows, forwarding, request inspection, and signature verification for Stripe, GitHub, Shopify, Slack, and custom HMAC workflows.
- Security posture:** SSRF-conscious forwarding and replay safeguards for tooling that handles user traffic.
- Public proof:** Dev.to webhook articles, Apify listing, and Show HN launch.

- **Links:** <https://github.com/ar27111994/webhook-debugger-logger> · <https://apify.com/ar27111994/webhook-debugger-logger> · <https://news.ycombinator.com/item?id=46632472>
- **Technologies used:** JavaScript, Node.js, real-time streaming, webhook security, API tooling, Apify.

penpot-mcp

AI-agent skill for creating, auditing, and maintaining Penpot design systems, prototypes, tokens, and design-to-code workflows via the official Penpot MCP Server.

- **Highlights:** bridges open-source design tooling, MCP, agent skills, design systems, prototype flows, interactions, and design-to-code workflows.
- **Links:** <https://github.com/ar27111994/penpot-mcp> · <https://www.skills.sh/ar27111994/penpot-mcp>
- **Technologies used:** JavaScript, MCP, Penpot, design systems, agent-skill packaging.

antigravity-awesome-skills

Curated collection of 200+ agentic skills for Claude Code / Antigravity / Cursor-style AI-agent workflows.

- **Positioning:** practical skill curation and packaging for AI-assisted development environments.
- **Link:** <https://github.com/ar27111994/antigravity-awesome-skills>

Aesthetic Palettes

Open-source color palette generator with zero-cost infrastructure direction.

- **Highlights:** WCAG-aware color work, typography support, UX research, and practical visual tooling.
- **Links:** <https://github.com/ar27111994/Aesthetic-Palettes> · <https://aesthetic-palettes.vercel.app>

code-the-countdown

Countdown project built for Google I/O 2026 "Code the Countdown."

- **Highlights:** TypeScript / React / Next.js challenge work involving canvas, motion, Web Audio, and WebGL-oriented UI experimentation.
- **Link:** <https://github.com/ar27111994/code-the-countdown>

DataGuard

Data quality and ETL validation product direction for CSV, Excel, JSON, and related structured-data workflows.

InterActNote

Android-first call-time context and relationship notes product focused on practical in-call context and relationship memory.

EXPANDED OPEN-SOURCE / FREEMIUM WORK

OpenCart 3.x extension work

- **OpenCart 3.x three-level menu:** simple three-level menu extension for OpenCart 3.
- **OpenCart 3.x Obligr SMS order alert with customized admin email:** extension for Indian merchants that sends SMS alerts when a customer places an order and provides a customized admin email with store logo, billing/shipping addresses, order details, totals, and direct admin-order link.
- **Marketplace listing:** https://www.opencart.com/index.php?route=marketplace/extension/info&extension_id=33156

Mosaico Codelgniter integration

- Integrated the open-source, client-side Mosaico responsive email template editor with a custom PHP Codelgniter backend and database layer.
- Released as open-source and free for commercial use.
- **Link:** <https://github.com/ar27111994/Mosaico-Codelgniter-Ion-Auth>

National Criminals Database

- WCF / ASP.NET MVC sample project demonstrating N-layered architecture and service-oriented application design.
- Includes web-client contracts, service host structure, dependency registration for services, and unit-test-oriented project structure.
- **Link:** <https://github.com/ar27111994/National-Criminals-Database>

OpenBiz CRUD Scaffolding Templates

- CRUD scaffolding templates with AJAX-based searching, sorting, paging, and import/export support for Excel and CSV.
- Designed as a complete web-grid experience built on top of Entity Framework 6 and the Generic Repository Pattern.
- **Link:** <https://github.com/ar27111994/OpenBiz-CRUD-Scaffolding-Templates>

OpenBiz — Supply Chain Management System

- Open-source supply-chain management system built with ASP.NET MVC, Entity Framework, Razor, C#, jQuery, Bootstrap, CKEditor, DataTables, and CSS3.
- **Link:** <https://github.com/ar27111994/OpenBiz>

Bookstore and Shopping Cart Library

- **Bookstore:** full-featured, SEO-friendly bookstore with admin panel built in vanilla PHP from a PSD template.
- **Shopping Cart Library:** PHP class for adding, deleting, updating, saving, displaying, and destroying cart items; historically used by hundreds of users on phpclasses.org.
- **Links:** <https://github.com/ar27111994/bookstore> · <https://github.com/ar27111994/ShoppingCartLibraryv1.0>

Additional GitHub / gist proof

EXPERIENCE

Frontend Engineer — Eagle 6

Feb 2018 – Mar 2022

Worked on a cybersecurity product focused on helping large enterprises detect unknown vulnerabilities before they exposed systems to risk. Contributed to complex, workflow-heavy product modules in an Agile environment.

Key contributions:

- Built and maintained enterprise product modules involving document workflows, file and folder management, permissions, large-file uploads, data visualization, and interactive system interfaces.
- Implemented frontend for cloud storage and organization chart modeling modules of the company's flagship enterprise product.
- Built file and folder management interfaces with role-based permissions, file preview/edit capabilities, and access controls based on file type and user permission.
- Implemented plugin-based online editors for Microsoft Office-style document viewing/editing, comments, concurrent editing, PDF export, and permission-based content access.
- Implemented chunked file and folder upload flows using the TUS protocol to support scalability and large uploads.
- Architected data access and state management for an organization chart modeling module using Akita.
- Built and maintained graphing and mapping interfaces for monitoring-related product modules using D3, Highcharts, Leaflet, and OSM.
- Facilitated code quality and scalability improvements through Redux/Flux-style state-management restructuring, review, and feedback for UI developers.

- Standardized output with responsive and accessible UI patterns influenced by Google Material Design standards.
- Assessed UX/UI designs for technical feasibility, estimated implementation work, collaborated with product team members, and supported hiring/interviewing for frontend developers.

Technologies used: Angular, TypeScript, Angular Material, RxJS, Akita, GoJS, D3, Highcharts, Leaflet, OSM, Jest, SCSS, BEM, TUS, JavaScript, jQuery, Bootstrap.

Full-Stack Freelance Contractor — Upwork / Independent Client Work
May 2017 – Feb 2018

Delivered independent full-stack projects across web and mobile, taking ownership from implementation through deployment while adapting to varied stacks, client constraints, and inherited codebases.

Key contributions:

- Built and delivered solo projects for multiple clients across web and mobile in an efficient, client-facing freelance environment.
- Implemented, maintained, and extended inherited projects, often stepping into existing codebases and stabilizing or expanding them.
- Created fully featured mobile apps and supporting REST APIs/database backends using Ionic, Angular, PHP, MySQL, and Apache Cordova integrations.
- Worked across frontend, backend, deployment, debugging, open-source issue resolution, and infrastructure responsibilities depending on project needs.
- Contributed bug fixes to open-source libraries to solve issues encountered in client projects.
- Built and deployed backend systems using UNIX/Linux, Apache, Nginx, and related infrastructure.
- Created a Microsoft Remote Desktop Services project with Citrix App Layering on Azure integration, learning and applying the required stack during delivery.
- Spun out selected open-source projects from freelance work where client permission allowed it.

Technologies used: Angular, Ionic, TypeScript, JavaScript, jQuery, PHP, CodeIgniter, WordPress, OpenCart, C#, SQL Server, MySQL, Azure, Apache, Nginx, Linux, Cordova, Xamarin.

Founder / Owner — Goggle Hunt
May 2017 – Sep 2017

Started, operated, marketed, and sold a Shopify dropshipping store targeting U.S. and European markets around fashion and sports goggles.

Reference links:

- **Flippa exit listing:** <https://flippa.com/9034806-your-one-stop-shop-for-fashion-and-sports-goggles>
- **Gleam platform used for subscriber competitions:** <https://gleam.io/>

Key contributions:

- Built and operated the business while also working as a freelance full-stack developer.
- Managed product sourcing, store operations, and day-to-day execution.
- Ran influencer outreach and giveaway campaigns to grow awareness.
- Created and managed multiple social media accounts and built initial audience traction.
- Collected approximately 150 email subscribers through competition-driven growth.
- Set up Facebook Merchant integration and social commerce flows.
- Sold the business on Flippa to focus more fully on software development.

PHP Developer — GMINNS
Jul 2015 – Apr 2016

Worked on customization of a school management system based on customer needs and contributed initial development for a Saudi football federation club management portal.

Web Developer — COMITS
Jul 2014 – Mar 2015

Built WordPress websites for local businesses and a local newspaper, and developed an e-commerce website in OpenCart.

TECHNICAL SKILLS

Primary Focus

- Developer tools, workflow automation, webhooks/APIs, agent systems, AI-assisted workflows, full-stack product engineering, performance-conscious software.

Frontend

- TypeScript, Angular, React, Next.js, interactive UI architecture, complex workflow UX, state management, design systems.
- RxJS, Angular Material, Akita, Redux/Flux concepts, Jest, SCSS, BEM, D3, Highcharts, GoJS, Leaflet, OSM, WebGL-oriented UI experimentation.

Backend / Systems

- Node.js, Express, ASP.NET Core, PHP, CodeIgniter, WordPress, OpenCart, API integrations, automation systems, structured-data workflows.
- Reliability, debugging, maintainability, security-sensitive defaults, performance-conscious design.

Data / Platforms / Delivery

- MySQL, SQL Server, Docker, Azure, Linux deployments, Apify, Vercel, Git, GitHub, Jira, Confluence, Trello, VS Code, WebStorm, Visual Studio.
- Apache, Nginx, IIS, XAMPP/phpMyAdmin, Cordova, Xamarin, Citrix App Layering.

EDUCATION

M.C.S. — Master of Computer Science

Arid Agriculture University, Rawalpindi

Oct 2014 – Aug 2016

Selected coursework:

- Digital Design; Web and Desktop Development; Operating Systems; System Programming; Networking.
- Software Engineering; Database Systems; Artificial Intelligence; Data Structures.

B.Sc. — Bachelor of Science (Computer, Statistics and Mathematics)

University of the Punjab

Sep 2012 – Jul 2014

Selected coursework:

- Computer Science; Software Engineering; Databases; Operating Systems.
- Statistics and Probability; Calculus; Mathematical Methods.

CERTIFICATIONS / COURSEWORK

Coursera — Machine Learning Strategy & Error Analysis

Completed: 12/05/2019

Certificate verification: <https://www.coursera.org/account/accomplishments/verify/HQ3883739EQ7>

Course syllabus included:

- Diagnosing errors in machine-learning systems and prioritizing directions for reducing error.
- Working with complex ML settings such as mismatched train/test sets and human-level performance comparisons.
- Applying end-to-end learning, transfer learning, and multi-task learning.

Coursera — Deep Learning Best Practices & Optimization

Completed: 07/04/2019

Certificate verification: <https://www.coursera.org/account/accomplishments/verify/U4QYCQLM9WUH>

Course syllabus included:

- Industry best practices for building deep-learning applications.
- Initialization, L2/dropout regularization, batch normalization, gradient checking, and optimization.
- Mini-batch gradient descent, Momentum, RMSprop, Adam, and convergence checking.
- Train/dev/test setup and bias/variance analysis for the deep-learning era.

Coursera — Deep Learning Foundations + TensorFlow

Completed: 20/08/2018

Certificate verification: <https://www.coursera.org/account/accomplishments/verify/TDDMYNV57A99>

Course syllabus included:

- Major technology trends driving deep learning.
- Building, training, and applying fully connected deep neural networks.
- Implementing efficient vectorized neural networks and understanding key architecture parameters.

(continued from previous page)

Coursera — Big Data Fundamentals & Hadoop

Completed: 29/10/2018

Certificate verification: <https://www.coursera.org/account/accomplishments/verify/HHVS4SJNXDR8>

Course syllabus included:

Big Data landscape, real-world big-data problems, and data sources: people, organizations, and sensors.
Volume, velocity, variety, veracity, valence, and value; monitoring, storage, analysis, and reporting impacts.
Recasting big-data problems as data-science questions and using a structured analysis process.
Hadoop architecture, YARN, HDFS, MapReduce, and running a program using Hadoop.

Partner / active credential track

Microsoft Partner: partner identity associated with admin@ar27111994.dev.

Anthropic Partner: partner identity associated with admin@ar27111994.dev.

Anthropic certifications (completed Jun 2026):

Building with the Claude API — verify.skilljar.com/c/kqdnoajm977y

Claude Code in Action — verify.skilljar.com/c/gv2gvaw48jus

Introduction to Agent Skills — verify.skilljar.com/c/8wqzsm9q9o9w

Introduction to Model Context Protocol — verify.skilljar.com/c/nhscqtess3nq

Microsoft Virtual Academy

Microsoft Remote Desktop Services Deep Dive — Pending verification (microsoft.com/en-us/learning)

Provider: Microsoft Virtual Academy | Status: Pending verification
