AI-agent workflows

Open source

SUMMARY

Full-stack engineer and solo builder focused on developer tools, internal tools, webhook/API systems, workflow automation, and AI-assisted product workflows. Strong background in frontend architecture, interactive applications, and full-stack product delivery. Most useful on products that involve real workflow complexity, reliability concerns, technical tradeoffs, and practical implementation rather than generic brochureware.

BEST-FIT WORK

- Developer tools, internal dashboards, automation-heavy products, and engineering utilities.
- Webhook/API integrations, debugging systems, replay/validation flows, and workflow infrastructure.
- AI-assisted product workflows, agent-tooling infrastructure, MCP/design-to-code workflows, and reusable agent assets.
- Performance-sensitive frontend and full-stack engineering for products that need to stay maintainable.
- Taking rough product ideas and turning them into realistic systems with implementation, documentation, and launch proof.

SELECTED PRODUCT WORK

Webhook Debugger and Logger

Enterprise-grade webhook testing suite for developers: capture, inspect, replay, forward, validate, and mock webhook traffic in real time. Includes SSE live streaming, JSON Schema validation, signature verification, replay safeguards, and SSRF-conscious forwarding.

agent-harness

Node.js / TypeScript CLI for discovering, staging, activating, and wiring reusable AI-agent assets across VS Code/Copilot, OpenCode, Cursor, Zed, Claude Code, and Pi.

penpot-mcp

AI-agent skill for creating, auditing, and maintaining Penpot design systems, prototypes, tokens, and design-to-code workflows through MCP.

Additional open-source / freemium proof

- OpenCart 3.x extension listing:** https://www.opencart.com/index.php?route=marketplace/extension/info&extension_id=33156
- Mosaico CodeIgniter integration:** open-source WYSIWYG email template editor integration with custom PHP backend.
- OpenBiz / CRUD templates / Generic Repository Pattern:** ASP.NET MVC, Entity Framework, AJAX grid, import/export, and supply-chain management examples.
- Bookstore / Shopping Cart Library:** vanilla PHP bookstore and reusable shopping-cart class historically used by hundreds of users on phpclasses.org.

PUBLIC WRITING / TECHNICAL PROOF

- **Agent assets need a lifecycle, not a dumping ground:** <https://dev.to/ar27111994/agent-assets-need-a-lifecycle-not-a-dumping-ground-1i3h>
- **I built a more restrained alternative to giant AI skill bundles:** <https://dev.to/ar27111994/i-built-a-more-restrained-alternative-to-giant-ai-skill-bundles-1kf5>
- **Webhook debugging articles:** <https://dev.to/ar27111994>
- **Show HN: Webhook Debugger:** <https://news.ycombinator.com/item?id=46632472>

EXPERIENCE

Full-Stack Freelance Contractor — Upwork / Independent Client Work

May 2017 – Feb 2018

- Delivered independent full-stack projects across web and mobile, handling implementation, debugging, deployment, and client-specific adaptation.
- Built apps, REST APIs, internal workflows, and automation-heavy systems across varied stacks and inherited codebases.
- Created mobile apps and supporting REST APIs/database backends using Ionic, Angular, PHP, MySQL, and Apache Cordova integrations.
- Built and deployed backend systems on UNIX/Linux, Apache, Nginx, and related infrastructure.
- Created a Microsoft Remote Desktop Services project with Citrix App Layering on Azure integration.

Frontend Engineer — Eagle 6

Feb 2018 – Mar 2022

- Built and maintained complex enterprise product modules involving permissions, document workflows, large-file uploads, interactive visualizations, and workflow-heavy interfaces.
- Contributed to cloud storage, org-chart modeling, document editing, file/folder permissions, and monitoring-related graph/map interfaces in a cybersecurity environment.
- Implemented chunked upload flows using TUS, plugin-based document editors, and structured state management using Akita.
- Helped improve maintainability, scalability, and team quality through code review, UI architecture, and hiring/interview support.

Founder / Owner — Goggle Hunt

May 2017 – Sep 2017

- Built, operated, marketed, and sold an e-commerce business targeting U.S. and European markets.
- Ran product sourcing, influencer outreach, giveaways, social media accounts, email capture, and Flippa exit process.

Earlier Technical Work

- **PHP Developer — GMINNS:** school management customization and Saudi football federation club management portal work.
- **Web Developer — COMITS:** WordPress sites for local businesses/newspaper and OpenCart e-commerce development.

TECHNICAL SKILLS

Frontend: TypeScript, Angular, React, Next.js, RxJS, Angular Material, SCSS, interactive UI architecture, state management.

Backend / Systems: Node.js, Express, PHP, ASP.NET Core, CodeIgniter, APIs, automation systems, structured-data workflows.

Delivery: Docker, Azure, Linux deployments, Apify, Vercel, Git, VS Code, WebStorm, Visual Studio.

Additional: MySQL, SQL Server, Apache, Nginx, Ionic, Cordova, WordPress, OpenCart, Xamarin.

EDUCATION & CERTIFICATIONS

- **M.C.S. — Master of Computer Science**, Arid Agriculture University, Rawalpindi. Coursework included web/desktop development, operating systems, system programming, networking, software engineering, databases, AI, and data structures.
- **B.Sc. — Computer, Statistics and Mathematics**, University of the Punjab. Coursework included computer science, software engineering, databases, operating systems, statistics/probability, calculus, and mathematical methods.

- **Coursera certificates:** ML strategy/error analysis, deep-learning best practices/optimization, TensorFlow/deep-learning foundations, Big Data/Hadoop fundamentals.
- **Partner status:** Microsoft Partner and Anthropic Partner via admin@ar27111994.dev; Anthropic certifications in progress.
