Microsoft Partner Anthropic Partner Open-source maintainer Devtools builder Webhook tooling AI-agent workflows Performance-conscious full-stack engineering

SUMMARY

Product-minded full-stack engineer and solo builder focused on developer tools, workflow automation, agent systems, webhook/API infrastructure, and performance-conscious software. Strong background in frontend architecture, interactive product engineering, and full-stack delivery across web, mobile, API-driven, and enterprise workflow systems. Recent work centres on practical developer tools, reusable AI-agent assets, automation-heavy products, open-source/freemium infrastructure, and technical writing that turns shipped work into credible proof.

CURRENT TECHNICAL DIRECTION

- Developer tooling:** webhooks, API debugging, AI-agent assets, MCP/design-to-code integration, and CLI tooling.
- Product execution:** open-source products with documentation, launch writing, HN/Product Hunt presence, and realistic paths to adoption or monetization.
- Engineering taste:** maintainable systems over fragile demos: readable architecture, predictable behavior, practical deployment, and performance-aware UX.
- Partner / certification track:** Microsoft Partner and Anthropic Partner identity through admin@ar27111994.dev; active Anthropic certification work completed Jun 2026.

SELECTED PRODUCTS & OPEN-SOURCE WORK

Webhook Debugger and Logger

Enterprise-grade webhook testing suite for developers: capture, inspect, replay, forward, validate (JSON Schema), mock, and stream webhook events in real time. Includes SSE live streaming, SSRF-conscious forwarding, signature verification (HMAC-SHA256), and a structured incident log.

Links: <https://github.com/ar27111994/webhook-debugger-logger> · <https://webhook.ar27111994.dev>

agent-harness

Node.js / TypeScript CLI for discovering, staging, activating, and wiring reusable AI-agent assets (skills, instructions, context files) across VS Code/Copilot, OpenCode, Cursor, Zed, Claude Code, and Pi.

Links: <https://github.com/ar27111994/agent-harness>

penpot-mcp

AI-agent skill for creating, auditing, and maintaining Penpot design systems, prototypes, and design tokens; enables design-to-code workflows through MCP.

Links: <https://github.com/ar27111994/penpot-mcp> · <https://www.skills.so/skills/penpot-mcp>

Aesthetic Palettes / code-the-countdown

WCAG-aware color palette tool and Google I/O 2026 challenge submission; TypeScript, React/Next.js, canvas animation, Web Audio API, WebGL-oriented UI experimentation.

LEGACY OSS / FREEMIUM WORK

OpenCart 3.x Extension

Published extension on OpenCart marketplace. Listing: https://www.opencart.com/index.php?route=marketplace/extension/info&extension_id=33156

Mosaico Codelgniter Integration

Open-source WYSIWYG email template editor integrated with Codelgniter; used in production email marketing workflows.

Link: <https://github.com/ar27111994/Mosaico-with-Code-Igniter>

OpenBiz — Supply Chain Management System

Open-source supply-chain management system built with ASP.NET MVC, Entity Framework, Razor, C#, jQuery, Bootstrap, CKEditor, DataTables, and CSS3.

Link: <https://github.com/ar27111994/OpenBiz>

Bookstore and Shopping Cart Library

Bookstore: full-featured, SEO-friendly bookstore with admin panel built in vanilla PHP from a PSD template.

Shopping Cart Library: PHP class for adding, deleting, updating, saving, displaying, and destroying cart items; historically used by hundreds of users on phpclasses.org.

Links: <https://github.com/ar27111994/bookstore> · <https://github.com/ar27111994/ShoppingCartLibraryv1.0>

EXPERIENCE

Frontend Engineer — Eagle 6 Feb 2018 – Mar 2022

Built complex enterprise product modules within a multi-product SaaS platform involving document workflows, file management, permissions, large-file uploads, data visualization, and interactive system interfaces.

Implemented cloud storage integration, org-chart modeling, plugin-based document editing, TUS chunked uploads, and graph/map interfaces using Angular, Akita, D3, Highcharts, GoJS, Leaflet, and OSM.

Standardised output with responsive and accessible UI patterns influenced by Google Material Design standards.

Assessed UX/UI designs for technical feasibility, estimated implementation work, collaborated with product team members, and supported hiring/interviewing for frontend developers.

Technologies: Angular, TypeScript, Angular Material, RxJS, Akita, GoJS, D3, Highcharts, Leaflet, OSM, Jest, SCSS, BEM, TUS, JavaScript, jQuery, Bootstrap.

Full-Stack Freelance Contractor — Upwork / Independent Client Work May 2017 – Feb 2018

Delivered independent full-stack projects across web and mobile, taking ownership from implementation through deployment while adapting to varied stacks, client constraints, and inherited codebases.

- Built and delivered solo projects for multiple clients across web and mobile in an efficient, client-facing freelance environment.
- Implemented, maintained, and extended inherited projects, often stepping into existing codebases and stabilising or expanding them.
- Created fully featured mobile apps and supporting REST APIs/database backends using Ionic, Angular, PHP, MySQL, and Apache Cordova integrations.
- Worked across frontend, backend, deployment infrastructure, and client communication simultaneously.
- Built and deployed backend systems on UNIX/Linux, Apache, Nginx, and related infrastructure.

- Created a Microsoft Remote Desktop Services project with Citrix App Layering for enterprise application virtualisation.

(continued from previous page)

Founder / Owner — Goggle Hunt May 2017 – Sep 2017

Built, operated, marketed, and sold a Shopify dropshipping store; handled product sourcing, influencer outreach, giveaway campaigns, email capture flows, and Flippa exit.

PHP Developer — GMINNS Jul 2015 – Apr 2016

Developed and maintained PHP web applications; implemented database-driven features, custom CMS components, and client-specific integrations.

Web Developer — COMITS Jul 2014 – Mar 2015

Delivered client web projects using PHP and JavaScript; responsible for frontend implementation, backend logic, and deployment.

TECHNICAL SKILLS

Frontend

TypeScript, Angular, React, Next.js, interactive UI architecture, complex workflow UX, state management, design systems.
RxJS, Angular Material, Akita, Redux/Flux concepts, Jest, SCSS, BEM, D3, Highcharts, GoJS, Leaflet, OSM, WebGL-oriented UI experimentation.

Data / Platforms / Delivery

MySQL, SQL Server, Docker, Azure, Linux deployments, Apify, Vercel, Git, GitHub, Jira, Confluence, Trello, VS Code, WebStorm, Visual Studio.
Apache, Nginx, IIS, XAMPP/phpMyAdmin, Cordova, Xamarin, Citrix App Layering.

Backend / Systems

Node.js, Express, ASP.NET Core, PHP, CodeIgniter, WordPress, OpenCart, API integrations, automation systems, structured-data workflows.
Reliability, debugging, maintainability, security-sensitive defaults, performance-conscious design.

EDUCATION

M.C.S. — Master of Computer Science
Arid Agriculture University, Rawalpindi
Oct 2014 – Aug 2016

Selected coursework:

Digital Design; Web and Desktop Development; Operating Systems; System Programming; Networking.
Software Engineering; Database Systems; Artificial Intelligence; Data Structures.

B.Sc. — Bachelor of Science (Computer, Statistics and Mathematics)
University of the Punjab
Sep 2012 – Jul 2014

Selected coursework:

Computer Science; Software Engineering; Databases; Operating Systems.
Statistics and Probability; Calculus; Mathematical Methods.

CERTIFICATIONS / COURSEWORK

Coursera — Machine Learning Strategy & Error Analysis

Completed: 12/05/2019

Certificate verification: <https://www.coursera.org/account/accomplishments/verify/HQ3883739EQ7>

Course syllabus included:

Diagnosing errors in machine-learning systems and prioritising directions for reducing error.
Working with complex ML settings such as mismatched train/test sets and human-level performance comparisons.
Applying end-to-end learning, transfer learning, and multi-task learning.

Coursera — Deep Learning Best Practices & Optimization

Completed: 07/04/2019

Certificate verification: <https://www.coursera.org/account/accomplishments/verify/U4QYCQLM9WUH>

Course syllabus included:

Industry best practices for building deep-learning applications.
Initialisation, L2/dropout regularisation, batch normalisation, gradient checking, and optimisation.
Mini-batch gradient descent, Momentum, RMSprop, Adam, and convergence checking.
Train/dev/test setup and bias/variance analysis for the deep-learning era.

Coursera — Deep Learning Foundations + TensorFlow

Completed: 20/08/2018

Certificate verification: <https://www.coursera.org/account/accomplishments/verify/TDDMYNV57A99>

Course syllabus included:

Major technology trends driving deep learning.
Building, training, and applying fully connected deep neural networks.
Implementing efficient vectorised neural networks and understanding key architecture parameters.

(continued from previous page)

Coursera — Big Data Fundamentals & Hadoop

Completed: 29/10/2018

Certificate verification: <https://www.coursera.org/account/accomplishments/verify/HHVS4SJNXDR8>

Course syllabus included:

Big Data landscape, real-world big-data problems, and data sources: people, organisations, and sensors.
Volume, velocity, variety, veracity, valence, and value; monitoring, storage, analysis, and reporting impacts.
Recasting big-data problems as data-science questions and using a structured analysis process.
Hadoop architecture, YARN, HDFS, MapReduce, and running a program using Hadoop.

ANTHROPIC CERTIFICATIONS (COMPLETED JUN 2026)

Building with the Claude API — verify.skilljar.com/c/kqdnoajm977y

Claude Code in Action — verify.skilljar.com/c/gv2gvaw48jus

Introduction to Agent Skills — verify.skilljar.com/c/8wqzsm9q9o9w

Introduction to Model Context Protocol — verify.skilljar.com/c/nhscqtess3nq

MICROSOFT VIRTUAL ACADEMY

Microsoft Remote Desktop Services Deep Dive — Pending verification (microsoft.com/en-us/learning)
